

Master's thesis (A-900)
(MAGISTRITÖÖ)
(Магистерская диссертация)

SUBJECT DESCRIPTION

Credits (ECTS)	30.00 ECTS
Assessment	grading
Aim of the subject and short description	
<p>The aim of the study is to enable the student to exhibit one's competencies by solving a practical research task and effectively presenting the acquired professional knowledge. The Master thesis is the most important written assignment of the master's studies. The thesis must include either the presentation of a scientific problem or a development project, theoretical analysis, and in case of a development project also the description of the realization with explanations about the chosen means and methods. The student is able to certify one's skills of posing a problem, analysing and making conclusions thereof (or professional thinking), the skills of applying professional experience, literature, research methods and means of development (or professional methods), and the clear and reasoned presentation of results.</p>	
Learning outcomes:	
<p>Student:</p> <ol style="list-style-type: none">1. sets up a speciality-related research task and selects suitable theoretical starting points and sources;2. selects and applies different research methods based on the objective of the work;3. correctly uses the language of science (incl. terms and facts) and formats his/her master's thesis according to current formatting rules;4. knows how to implement the results of scientific research in practice;5. in his/her conclusions relies on an analysis and makes summaries in concert with the previous discussion presented in the work;6. presents and reasons the positions presented in his/her master's thesis.
